

FasTrack Pro v2.1 Update Instructions.

STEP 1: UPDATING THE SYSTEM

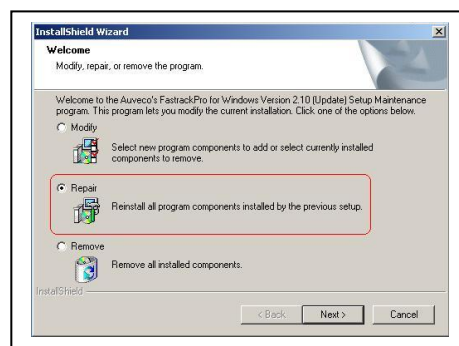

Place FasTrack Pro disk in your CD drive. The update application will “auto-run” and take you to this menu. (If the update CD fails to “auto-run” manually open the program finstall.exe located on the CD)

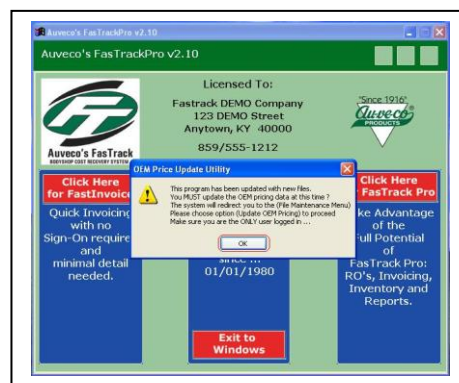

Select “Upgrade Installation”...you will get this message.

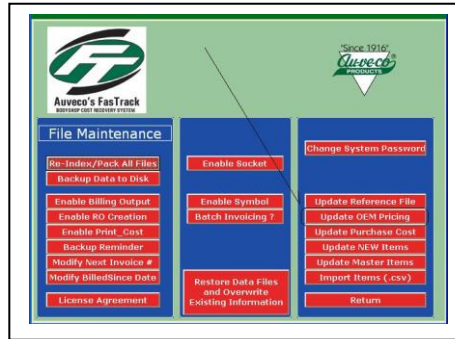

Choose “OK”....you will get this screen.

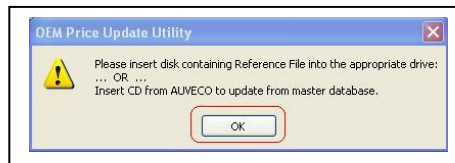

Choose “Repair” and click “Next”....follow the prompts on the install program taking the defaults settings and clicking next. When update install has completed, you will get this screen.

Click "OK" and you will be taken to this screen...

Click Update OEM pricing....you will get this message.

Make sure the FasTrack Pro v2.1 disk is still in your CD drive and click OK....the system will work for some time and then give you this message.

Click OK and you will get this message...

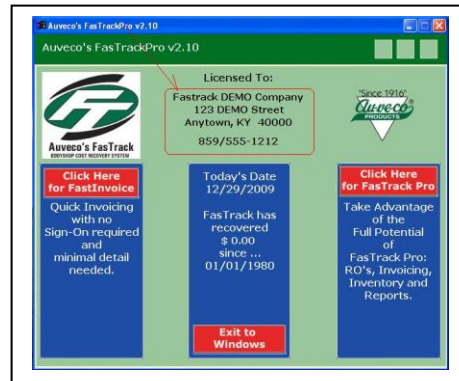

Click OK and will get this message....

You have now completed the steps of the file update process for FasTrack Pro v2.1. You now must re-brand the system for the body shop location information. The steps for that process follow.

STEP 2: Re-BRANDING THE SYSTEM

Make sure the FasTrack Pro Update CD that you have is specifically for the Body Shop location you are updating (check the CD label) and that remains in the CD drive. Start FasTrack by double-clicking the FasTrack Pro icon on your desktop or by going to START/All Programs/FasTrack Professional for Windows. FasTrack will start and display the main screen. Note that the Body Shop location information has reverted to "FasTrack Demo Company"

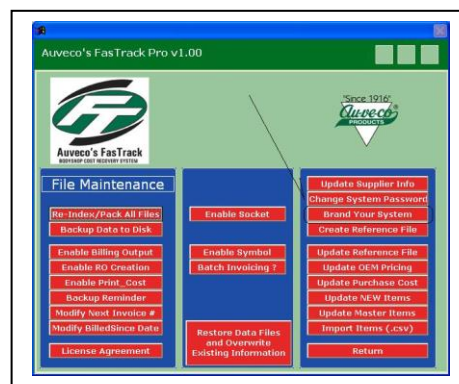

Click the red button to login to FasTrack Pro. Login using the manager login information

User ID: manager Password: ftrakmgr

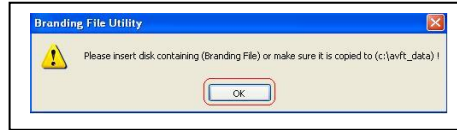

You will get this screen....

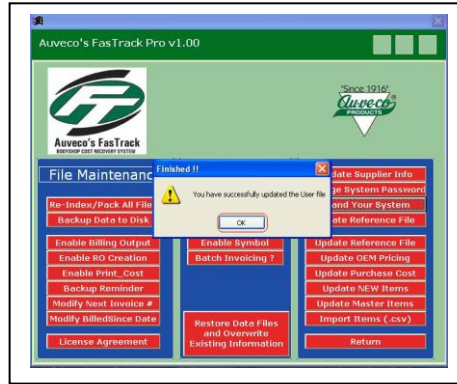

Click "File Maintenance"...You will get this screen.

Select "Brand Your System".....You will get this message.

Make sure the FasTrack Pro v2.1 disk is in the CD drive and click "OK"....You will get this message.

Click "OK" then click "Return" and log off the program as manager. You will now see that the Body Shop information has been updated to the information for your specific body shop.

FasTrack Pro v2.1 is now ready for use by the body shop user.
